

010335 Studio Lie & Loft Measuring Gauge

A lie and loft measuring gauge for fitting labs and studios. This is a highly functional and easy to use instrument built around the latest trends in clubhead design. It can manage dimensionally non-conforming clubheads with ease.

▲ Apron adjusts height wise to allow accurate face angle measurements to be made.

▲ Vernier style fractional scale with 1/10 of a degree accuracy and a resolution of 1/2 a degree.

▲ Loft angle measurement on irons.

▲ The apron and base provide two reference planes from which an accurate setup can be achieved.

Key Features:

- Table can accommodate oversized, non-conforming clubheads
- Measures right handed and left handed Woods, Hybrids, Irons and Putters
- Sliding shaft clamp mounted on precision linear guides.
- Height adjustable Face Angle Slider and groove alignment apron
- Engraved hosel offset & face progression scale
- Vernier protractor measures lie angle with a resolution of 0.25°

▲ Apron is mounted on Low friction precision linear slides.
